like string tension in (3+1) dimensions and the zero temperature string tension in 3 dimensions was found. The only missing point for a complete success of the dimensional reduction program was a disagreement (roughly of a factor of two) between the coupling constants quoted in [1] and that of [4].

The Spatial String Tension in High Temperature Lattice

It recently has been shown [4, 5] that in the case of an $SU(2)$ gauge theory the resulting spatial string tension remains temperature independent up to T_c and then starts rising rapidly.

The Spatial String Tension in High Temperature Lattice

surface tension is handled by the lattice Boltzmann model, and how reductions to surface tension can be sensibly implemented. Outline The main focus of the project which is the foundation of the thesis is to study the effects spatial variations in capillary effects have on fluid flow. This requires

Spatial Lattice Modulation for MIMO Systems Jiwook Choi, Yunseo Nam, and Namyoon Lee Abstract This paper proposes spatial lattice modulation (SLM), a spatial modulation method for multiple-input-multiple-output (MIMO) systems. The key idea of SLM is to jointly exploit spatial, in-phase, and
